Please check those php extension carefully. Because this script needs those extension to run smoothly.

2. The seconds important things is **Envato Item Purchase Code**. You have to **write your purchase code into the ".env" file**. This script throws **"Error Code 500"** if you didn't write your purchase code into the **".env"** file **within 24 hours**. Follow this **"<http://bit.ly/2DI3BOw>"** link to learn how to get Envato Purchase Code.
